

A15VSO, A15VO, A15VLO Changeover from series 11 to 12

Product Information Mobile Hydraulics | Pumps and motors | Axial piston pumps

A web-based configurator is being introduced for the product family A15. In addition to the shape and function-defining features, the configurator also request classification features such as setting data. As a result, the configurator create an unique type part number (eTTNR) that can directly be ordered.

The changeover and integration of the series in the new configurator also come with minor type code changes and require change of series from 11 to 12.

In the following, you will find an overview of type code changes:

01	02	03	04	05	06	07	08	09	10	/	11	12	13	14	15	16	17	18	19	-	20
LA15V	SO	210	P	DR	00	00	A	0	V		12	M	R	V	E4	A2	P	U000	0		0
A15V	SO	210	P	DR	00	00	A	0	V		12	M	R	V	E4	A2	P	U000	0		0
A15V	LO	210	P	DR	00	00	A	0	V		12	M	R	V	E4	A2	P	U000	0		0
A15V	O	210	P	DR	00	00	A	0	V		12	M	R	V	E4	A2	P	U000	0		0

Pos. 04 Introduction of letter "**P**" for one-sided swiveling, previously without code.

Pos. 06 to 07 Non-required fields for controller specification are filled with position "**00**".

Pos. 11 New series **12**

Installation dimensions, ports, technical data and functions remain unaffected by the series changeover.

Individual internal components are modified during model maintenance. The series must be taken into account for spare parts requirements.

The changeover of the individual nominal sizes is implemented step by step. The existing data sheets 92511 and 92801 are replaced by new data sheets 92512 (A15V(L)O) and 92802 (A15VS(L)O).

The changeover period is from 2022-01 to 2023-03.

Introduction and phase-out strategy

- | | |
|---|------------------|
| ▪ New configurator goes online | as of 2022-04-01 |
| ▪ Introduction of series 12 | |
| Start | as of 2022-03-01 |
| Completed | by 2023-02-28 |
| ▪ Repairs of series 11 by the service (status SR) | by 2031-12-31 |
| ▪ End of order for series 11 (status AE) | as of 2032-01-01 |

Deliveries in series 12
